In a concise paragraph or two, describe the important genres, sub-genres, and culture of the 1990s we discussed. Give some examples of bands, singers both male and female, how the styles divided the decade and why this division occurred. Remember – music influences culture and culture influences music. Think about what was going on in the early 90s and how things changed in the mid-late 90s (why genres and sub-genres came about, politics, fashion trends, how the computer and internet changed music, who was making the music, and what the musical legacy of the 90s is for you today). Use the chart on my web site if you need help ([paxtonmusic.org](http://paxtonmusic.org)).
